

---

## SUMMARY

I'm a full-stack developer with experience in both front-end and back-end technologies. Proficient in front-end technologies like HTML, CSS, JavaScript, and Laravel. Skilled in SQL Server for database management, RESTful APIs and familiar with version control using Git. Passionate about building scalable, user-friendly applications with clean, maintainable code.

---

## WORK EXPERIENCE

### Web Developer - Data Intuitions

August 2024 - January 2025

- Developed web applications using C#, ASP.NET MVC, and RESTful APIs. I worked on both front-end (CSHTML, Knockout.Js) and back-end tasks, including database operations with SQL Server. I also used Git for version control and focused on writing clean, maintainable code.

### Web Developer Intern - CodeSoft (Remote)

August 2023 - September 2023

- Contributed to both front-end development of various web projects.
- Implemented responsive design principle using HTML, CSS, and Bootstrap.
- Assisted in database management.

### Laravel intern - Productive Squad

October 2022 - January 2023

- Developed and maintained backend components of web applications using Laravel, improved performance by 20%.
- Collaborated with front-end developers to integrate user-facing

---
